About Us

WELCOME TO SHRI SWASTIK

With immense pleasure we welcome you to our edition of SHRI SWASTIK catalogue. It takes great pleasure to share that our range has been really liked for its best and consistent quality along with economical pricing. This year we have started a new facility specializing in OEM order handling, which gives us an edge over others in quick and swift processing of orders while at the same time delivering consistent quality. The addition of more warehouse space for both finished goods and semi-finished goods has helped to minimize the delivery time.

Our facility, which is already producing labware according to ASTM, DIN, and EN ISO, has been more equipped with the latest technology machinery to keep producing the best in-class glassware. New machines have been added to upscale the production and cater to the ever-increasing demand in the global market.

Our post purchase service and grievance handling process has been well appreciated and immensely applauded over the past years. Delivery highest quality labware is one dimension of our business, but at the same time any issue if at all which arises has been keenly sorted out and we aggressively work in the direction to maintain highest standards of service for pre and post purchase.

At SHRI SWASTIK, we have strived hard to identify the gaps in the market space and the requirements of the research fraternity. Biotechnologists at the heart of operations have ensured the requirements are being fulfilled with the right product with the right quality and, most importantly, at the right cost. With the same Zeal, we wish to continue the same forever.

We are an ISO-certified company; our high-quality products and in-house stringent testing methods have helped us earn a huge clientele all over the world. Our dedicated research & development department strives to work hard to maintain our brand and continuously upgrade ourselves to provide the best in-industry solutions to clients.

Any products that fall outside the range of the catalogue can be inquired about separately, and we will do our best in providing the same. We can also be contacted for customized glassware.

Certificates

Quality Policy

SHRI SWASTIK to produce and supply laboratory products at affordable prices that meet or exceed customer's expectations, with timely deliveries. We achieve this by obtaining customer feedbacks of our performance and making relevant changes in our management system for continual performance.

Quality Management System

SHRI SWASTIK **believes in** delivering world-class quality to all its clients globally and is recognized in the international market for a quality brand. The Quality Management System at SHRI SWASTIK is ISO 9001:2015 certified by Intertek and accredited to UKAS. SHRI SWASTIK Maintains a quality system manual for all its business processes and at all manufacturing and post-manufacturing levels; the quality system is strictly adhered to. People supervising work affecting quality at SHRI SWASTIK are trained internal auditors and carry out internal audits in routine practice.

About Us

Production and Process

Fabrication

RAW MATERIAL

- Tubing of ASTM E- 438 TYPE I, CLASS A BORO 3.3 GLASS.
- We import 450 MT of glass tubes annually.
- We have a minimum stock of 4 months at any point in time, which is more than 80 tonnes of glass tubing.

Raw Material

Our Packaging

About Us

Infrastructure

PRINTING MACHINE

- Helps print in bulk without compromising on the quality.

ULTRASONIC WASHING MACHINE

- SHRI SWASTIK uses state-of-the-art ultrasonic washing machine after the grinding process, which is developed and designed in-house to wash up to 5,000 pieces in 8 hours.
- For running the complete manufacturing facility, custom-made software is used.

Grinding Machine

Hand Polishing being done

Washing Machine

WAREHOUSE

- Our 6000m warehouse facility enables us to deliver quality products in the shortest amount of lead time.
- We have an approximate 4000 pallet position in our warehouse.

Finished Goods Area

About Us

Our Manufacturing Facility

SHRI SWASTIK manufacturing facility employs state-of-the-art manufacturing machines to create glass with world-class quality. SHRI SWASTIK has more than 35 glass blowers to make a wide product range as required by our vast customer base globally.

Our capacity enables us to produce and ship over 15 containers per month. Our complete range of products, which encompasses from interchangeable range to volumetric ware and filtration glassware to the general glassware range, are produced in-house using automatic and semi-automatic machines.

The annealing process is an integral part of the manufacturing process and each and every product produced undergo annealing process to create stress-free and strong glassware.

About Us

Calibration Facility

We are committed to producing highly accurate labware with an in-house ISO 4787:2015 accredited laboratory, well equipped with the latest equipment for calibration under a well-controlled environment. SHRI SWASTIK Calibration Laboratory has undertaken accreditation for its system for calibration and testing as per ISO 4787:2015, which means the calibration provided to customers for volumetric ware is acceptable in calibration laboratories worldwide.

Results of calibration are guaranteed for precision as per DIN, ISO, and USP. standards, the German calibration machines ensure the highest level of precision. During the calibration process on the automated German machines:

- The blanks are filled precisely with a defined amount of triple distilled water. under fixed temperature.
- The lowest meniscus point is determined by laser-controlled sensors and a fine The diamond wheel automatically marks the calibration.
- Cylinders, burettes, and pipettes are marked for minimum two-point calibration. lines.
- The wet surface area factor is always taken into account throughout the process...

All calibration laboratories at SHRI SWASTIK are strictly controlled and done under highly controlled environment maintain right temperature ,pressure and humidity. This temperature is very important for the accuracy so if the environmental temperature is different , calibration machines have to be adjusted accordingly. All volumetric glassware is calibrated either as "To contain" "TC, In" or "To deliver" "TD, Ex".

Automatic Volumetric
Calibration Machine

Delivery Policy

We believe in clear commitments for delivery and maintain heavy stocks for all the products to fulfill our orders well on time with the shortest lead times. Our warehousing capacity, which is increasing with each year has capacity to hold both finished goods and semifinished goods (for OEM) to ensure shortest lead time for both SHRI SWASTIK brand and OEM customers. In rare cases where the fulfillment is not possible with the in-house stocks, we commit clear timelines for delivery and religiously adhere to the same.

About Us

Our Quality Assurance Process

Raw Material

Right raw material as per our prefixed quality standards are procured from our china office. SHRI SWASTIK makes all its Products from tubing of ASTM E-438 TYPE I, CLASS B BORO 3.3 GLASS.

Production

The automated and semi automated machines are used to produce the products as per the technical drawings made according to international standards.

Dimensional Confirmation Checks

Dimensional checks are performed by the QC departments for their adherence to the defined standards.

Glass Optical Checks for Stress & Scatches

Each piece produced is checked for the stresses which might cause the cracking of the glasses and also for scratches which might happen while handling at each step for producing glass quality.

Glass Thickness and Strength

Every single piece produced is essentially checked for the wall thickness to determine the strength and ensure adherence to standards set as per DIN/ASTM/ISO.

Joint Testing

The Joints are tested for their fitness as per their taper of cones and sockets to ensure highest level fitness and ensure no leaks. Vacuum tests are performed subsequent to the fitness checks to ensure absolutely no leaks.

Post Printing Checks

The Glassware is checked for the print quality at two stages first before putting in the furnace and after taking out of furnace, this ensure no product with defective print reaches the market.

Pre & Post Purchase Service

We ensure that ease of doing business with Star Labs should be first motivation for each client and hence ensure top class service when it comes to smooth communication, query handling and grievance redressal approach.

Hydrometer Cylinder Class B tolerances according to DIN 12681 / ISO 6706.

- Highly transparent, without spout and overflow vessel.
- Hexagonal base with bottom studs provides high stability.
- With molded graduations and ring marks at the primary scale points, calibrated 'In'.
- Thermal stress up to 80 °C does not cause tolerance limits to be permanently exceeded.

Filtration

All Glass Filter Holder -47 mm, Filtration Assembly

- Made of Boro 3.3 with fritted glass filter base
- The filtration base has a silicon stopper
- The base design has an integral vacuum connection located above the filtrate drip to prevent contamination of vacuum line from droplets
- Borosilicate glass funnel, Capacity of Funnel 300 ml, base and tubulated cap; anodized aluminum spring clamp
- For HPLC Mobile phase Filtration
